

Experiment No. 5

Title: Practice kanban agile methodology - Problem Description: students are expected to design either a physical or software-based Kanban board for the given sample problems of your mini project.

1. **Team board for online marketing.**
2. **Team board for Sales.**
3. **Team board for product development.**
4. **Team board for time driven workflow.**
5. **Team board event driven workflow.**
6. **HR Kanban board - Board for content creation.**

Aim: To design and implement a **Kanban board** (physical or software-based) for different real-world workflows using Agile principles.

Objectives: Understand the concept of Kanban in Agile

Learn how to visualize workflow using boards

Apply Work-In-Progress (WIP) limits

Improve task tracking and flow efficiency

Design boards for different domains (Marketing, Sales, HR, etc.)

Software / Tools Required:

Digital Tools like,

- Trello
- **Jira**
- Notion
- ClickUp

Theory - Kanban board

What is Kanban?

Kanban is a **visual workflow management method** used in Agile to track tasks from start to completion.

a) Core Principles

- Visualize work
- Limit Work-In-Progress (WIP)
- Manage flow
- Continuous improvement

b) Basic Structure

A Kanban board typically has columns like: (Similar like Scrum but it can be visualised)

- **To Do**
- **In Progress**
- **Testing/Review**
- **Done**

Each task is represented as a **card**.

Practical Procedure:

Use this link - <https://www.atlassian.com/software/jira/features/kanban-boards>

1. Jira Kanban Board

The image shows the Jira Kanban Board landing page. The header includes the Jira logo, navigation links (Features, Solutions, Product guide, Templates, More +), a 'Get it free' button, a search icon, and a user profile (DL Dr Loganathan). The main content area features the heading 'Continuous delivery starts on the Jira kanban board' and a subheading: 'Kanban is a common framework for agile and DevOps software development that provides transparency of work and team capacity. Kanban boards in Jira help teams visualize their workflow, limit work-in-progress, and maximize efficiency.' Below this is another 'Get it free' button. To the right is an illustration of two people interacting with a large Kanban board.

2. Coose Marketing

The image shows the 'Jira for Marketing Teams' landing page. The header is identical to the first page. Below the header is a banner stating 'Atlassian recognized as a Leader in the 2025 Gartner Magic Quadrant™ for Marketing Work Management Platforms! [Learn more](#)'. The main content area has the heading 'JIRA FOR MARKETING TEAMS' and 'Great marketing starts with Jira'. Below this is the text: 'From simple tasks to complex projects, manage marketing the smart way - with Jira.' and a 'Get Jira free' button. To the right is a screenshot of a Jira 'Marketing Launch' project board. The board shows a list of tasks on the left, categorized by 'Research' and 'Vision'. The tasks are moved through columns labeled 'TO DO', 'IN PROGRESS', and 'On track'. A callout bubble points to the 'On track' column. The board also shows assignees and categories like 'Customer research', 'Vision', 'Social Campaign', and 'Website'.

3. Kanban Workspace

The screenshot shows the Jira Kanban Workspace for 'My Team'. The interface includes a sidebar with navigation options like 'Spaces', 'Recent', and 'Recommended'. The main area displays a list of tasks with columns for 'Type', 'Key', 'Summary', 'Status', and 'Assignee'. Two tasks are visible: 'Task 1' (KAN-1) and 'Task 2' (KAN-2), both in 'IN PROGRESS' status. The top navigation bar includes a search bar, a '+ Create' button, and a 'See plans' link.

Type	Key	Summary	Status	Assignee
Task	KAN-1	Task 1	IN PROGRESS	
Task	KAN-2	Task 2	IN PROGRESS	

4. Kanban Board Workspace

The screenshot shows the Jira Kanban Board Workspace for 'My Team'. The interface includes a sidebar with navigation options like 'Spaces', 'Recent', and 'Recommended'. The main area displays a Kanban board with columns for 'TO DO', 'IN PROGRESS', 'IN REVIEW', and 'DONE'. Two tasks are visible: 'Task 1' (KAN-1) and 'Task 2' (KAN-2), both in 'IN PROGRESS' status. The top navigation bar includes a search bar, a '+ Create' button, and a 'See plans' link.

TO DO	IN PROGRESS	IN REVIEW	DONE
+ Create	Task 1 Apr 14, 2026 KAN-1		
	Task 2		

5. Kanban Board Template

The screenshot shows the Jira Kanban Board Template interface. It includes a sidebar with navigation options like 'Spaces', 'Recent', and 'Recommended'. The main area displays a Kanban board with columns for 'Backlog', 'Not started', 'In progress', and 'Done'. A task card is visible in the 'In progress' column. The top navigation bar includes a search bar, a '+ Create' button, and a 'See plans' link.

Backlog	Not started	In progress	Done
		Task 1 Apr 14, 2026 KAN-1	
		LIMIT Maximum tasks: 5	

Create a Kanban Project

1. After login → Click **Create Project**
2. Choose **Kanban Template**
3. Select: Team-managed (simple for students)
4. Enter: Project Name (e.g., *Marketing Team Board*)
5. Click **Create**
6. Jira automatically creates a **Kanban board with default columns**

Understand Default Board

You will see columns like:

- ❖ Backlog
- ❖ To Do
- ❖ In Progress
- ❖ Done

Configure Columns (Important Step)

1. Click (•••) → **Configure Board**
2. Go to **Columns** (Columns = Workflow stages)
3. Edit based on your problem

Example:

- ❖ Marketing → Ideas / Creation / Approval / Published
- ❖ Sales → Leads / Contacted / Negotiation / Closed

Create Tasks (Cards)

- ❖ Click **Create**
- ❖ Fill details:
 - ❖ Task Name (Each task = one card on board)
 - ❖ Description
 - ❖ Assignee

Move Tasks Across Board

- ❖ Drag and drop tasks:
 - To Do → In Progress → Done

This shows real workflow movement (this is the whole point of Kanban).

Apply WIP Limits (Advanced)

1. Go to Board Settings
2. Set **maximum tasks per column**

Prevents overload and bottlenecks

Add Team Members

1. Click **Invite**
2. Add emails
3. Assign tasks

Execute 6 Lab Scenarios

1. Online Marketing Board

Columns:

- ❖ Ideas → Content Creation → Approval → Publishing → Analytics

2. Sales Board

Columns:

- ❖ Leads → Contacted → Negotiation → Closed

3. Product Development Board

Columns:

- ❖ Backlog → Design → Development → Testing → Deployment

4. Time-Driven Workflow

Columns:

- ❖ Today → This Week → This Month → Completed

5. Event-Driven Workflow

Columns:

- ❖ Event Triggered → Assigned → Processing → Done

6. HR Content Creation Board

Columns:

- ❖ Topic → Draft → Review → Edit → Publish

Example: Jira Template – HR Content Creation Kanban Board – Column Preparation

1. Project Setup

- Project Name: **HR Content Workflow**
- Template: **Kanban**
- Project Type: **Team-managed**

2. Columns Configuration (Exact Setup)

Go to **Board Settings** → **Columns** and set:

1. **Topic**
2. **Draft**
3. **Review**
4. **Edit**
5. **Publish**

Delete default columns like *Backlog* if not needed.

3. WIP Limits (Must Apply)

Set limits:

- Draft → 3
- Review → 2
- Edit → 2

This is where most students cheat—don't allow skipping.

4. Issue (Task) Template Format

Students must create tasks using this format:

Title:

[Content Type] – [Topic Name]

Example: *Job Post – Backend Developer*

Description:

- Objective:
- Target Audience:
- Platform (LinkedIn / Internal / Website):
- Deadline:

Assignee: Required

5. Predefined Tasks (Students MUST create these)

Tell them to copy-paste these 10 tasks:

1. Job Post – Software Engineer
2. Job Post – Data Analyst
3. Employee Onboarding Guide
4. HR Policy Update – Leave Rules
5. Internal Newsletter – April
6. Training Content – Workplace Ethics
7. Social Media Hiring Campaign
8. Employee Engagement Activity Plan
9. Performance Review Guidelines
10. Internship Announcement

6. Labels (Force Better Organization)

Create labels:

- Recruitment
- Training
- Policy
- Internal
- Social

Each task must have at least **one label**

7. Roles Assignment

Assign roles (even if same student acts multiple roles):

- Content Writer → Draft
- HR Manager → Review
- Editor → Edit
- Admin → Publish

8. Workflow Simulation (Mandatory)

Students must perform:

- ❖ Move at least **5 tasks fully across all columns**
- ❖ Move at least **2 tasks backward (Review → Edit)**
- ❖ Keep at least **one column hitting WIP limit**

Use the same procedure/steps involved for the following

1. Team board for online marketing.
2. Team board for Sales.
3. Team board for product development.
4. Team board for time driven workflow.

5. Team board event driven workflow.

Result

Tasks are successfully designed and implemented using Kanban boards for real-world workflows, demonstrating understanding of Agile principles.
